SKILLS

- **Python**
- **Proteus**
- **Microcontrollers (Arduino, ESP32)**
- **C/C++**
- **Ms Office (Word, Excel,ppt)**
- **SQL Basics**
- **HTML/CSS**

Soft Skills

Communication	Time Management
Patience	Teamwork
work ethic	Adaptability
self motivated	Presentation skill

PERSONAL INTEREST

- Reading
- Drawing
- Cooking
- Writing

OBJECTIVE

Motivated and enthusiastic fresher eager to contribute to a progressive organization that values creativity, innovation, and continuous learning. Excited to apply academic knowledge, adaptability, and strong communication skills while gaining hands-on experience. Looking forward to developing professionally in a supportive environment with opportunities for growth.

INTERNSHIP EXPERIENCE

Duration: 1month

SMART E-CYCLE RENTAL SYSTEM

Designed and implemented a Smart E-Cycle Rental System using Wokwi simulation, inspired by government smart bike parking systems. Integrated payment verification, automatic lock/unlock mechanism, and user-defined rental timing. The system tracks ride duration, provides alerts before time expiry, and auto-locks the cycle. Supports flexible parking and ensures secure, efficient, and user-friendly rental management.

CERTIFICATION

- NSIC (embedded c course) - 1month
- Outskill- generative ai mastermind - 2days workshop
- Basic full stack developement - 1 month
- English typist

FINAL YEAR PROJECT

E-VOTING SYSTEM WITH ACCURATE REAL – TIME RESULT CALCULATION

Built a secure offline e-voting system using Python and MySQL, integrated with Arduino Nano hardware components (buttons, LEDs, buzzer,I2C) for real-time interaction. Implemented role-based authentication for admin and users, ensuring restricted database access. Designed an automated voting workflow with system reset after each vote. Developed an admin dashboard for result monitoring and incorporated QR code-based verification to enhance security and enforce one-person-one-vote functionality.
